Precipitation probability							
70%	70%	70%	30%	20%	20%	00%	00%

Forecast for Monday 27 Jun 2022

Weather: A wet start, with persistent rain that will turn heavy at times. Towards lunchtime there is a low risk of thunderstorms but by the afternoon it will become much drier and brighter. Sunny spells and the risk of the odd shower until the evening. Much calmer than recent days.

Chance of cloud-free hill tops above 800m: Less than 10% first thing, becoming 100% by lunchtime.

Low Cloud and visibility: Poor overnight and first thing with widespread cloud bases of around 500m and heavy rain making for poor visibility. Improving to become excellent away any localised deteriorations in showers from lunchtime.

Meteorologist's View

With a southwesterly wind, western facing slopes will see the poorest conditions through the morning. By the afternoon conditions will be much better for walking for most areas and with moderate UV levels it will feel warm in the sunshine.

Forecast for Tuesday 28 Jun 2022

Weather: After a drier start it will soon turn into a wet and very windy day, rain will be most persistent across western facing slopes and hills.

Maximum wind: Southerly mean 35mph gusts of 52mph.

Chance of cloud-free hill tops above 800m: 100% becoming less than 10% by mid-afternoon.

Low Cloud and visibility: Cloud bases above the summits until mid-afternoon when widespread cloud with bases of around 400m will cover most areas. From mid-morning onwards visibilities will deteriorate in any rain and showers.

Temperature: **Valleys:** Plus 11 Celsius becoming Plus 16 Celsius.
At 800m: Plus 9 Celsius.
Freezing level: Above the summits.
